GREATS TRIKE IN ALTA MINE

Little Pittsburg Taps Solid Body of Galena in Tunnel.

MAMMOTH WILL PAY \$20.000

GOOD SPRINGS RICH IN MIN-ERAL VEINS.

into the mass for four feet without

into the mass for four feet without disclosing its width.

Samples of the ore were seen in the city yesterday, and they had all the appearance of having come from a massive body, in which nothing resembling gangue or waste was discernible. The management of the company has been keeping its own counsel regarding the strike, though it was anticipated three weeks ago, when iron sulphides began to make their appearance at the face. It was then that George E. Gunn of the American Smelting & Refining company inspected the mine and predicted that a body of good ore was soon to be tapped.

Sam M. Levy, who was at the mine Sunday, was seen during the afternoon and while he did not dear the face.

Sunday, was seen during the after-noon, and while he did not deny that the strike had been made, he stated that there was nothing concerning it that he could give out. The news pre-ceded him, however, and the strike, as

MAMMOTH DIVIDEND.

Directors Order \$20,000 Paid on the Fifteenth.

Right on time, and without waiting for the month to acquire any age, the directors of the Mammoth Mining company met yesterday afternoon and posted the company's dividend for August in the sum of \$20,000, or 5c a share on the capital stock of the corporation. Books were ordered closed against the transfer of stock on the afternoon of the 9th, payment to follow on the 15th. During July the Mammoth company sent to market sixty fifty-ton carloads of ore, or an average of 100 tons per day, and that with a layoff of three days for the holidays. Some of the ore was very high grade, while all of it afforded a handsome profit, and Manager Samuel McIntyre, whe came in from camp Sunday night, stated that the mine was looking better and better as development on the lower levels progressed. Shipments indicate pretty well what a mine is doing, particularly where, as is the case with the Mammoth company, settlement figures are produced and given to the public whenever a request is made for them.

ORE FROM NEW BRUNSWICK. Copper Company at Dorchester Hav-

ing Tests Made Here. The management of the American Metals Extraction company of this city was yesterday in receipt of a consignment of crushed ore and a barrel of solution carrying copper, from Dorchester, N. B. both of which are to be tested by the Laist process of extraction and precipitation as exemplified by the company at its plant on West Temple street.

The shipment was made by the Intercolonial Copper company, which owns a

sto \$140 per ton and about 27 per cent clinabar.

Harvey Tardy, who has been down there several months, has secured the north and south extensions of this property, and Mr. Daugherty says he has a very fine showing also. The same ground shows a ledge carrying high-grade galena, five feet of it at the grass-roots. The vein parallels the gold-clinnbar ledge at a distance of 150 feet.

Four miles east of here is located a remarkably strong copper belt on which are located the Ninety-Nine, the Keystone Columbia, Double-Up and other properties. The copper belt is located on the east side of Potosi mountain, the veins occurring low down in the foothills, where they are easily accessible.

The Ninety-Nine, which is located just north of James M. Kennelly's Double-Up recently shipped six cars of ore, which, after hauling by wagon forty miles and shipping by rail 1,000 miles to a smelter, netted the company \$6,497.96. The ore averaged about 20 per cent copper in addition to the gold and silver contents of the rock.

The Columbia property, secured by

while the force at the Keystone has just been increased.

Mr. Daugherty does not think much of the region close to Callentes and considers that the information concerning labulous strikes which are being almost daily sent out should be taken with a great deal of sail. Good reports and not a little fine gold ore are coming from the Virgin river country, in the extreme southeastern portion of Nevada, Mr. Daugherty says, and he believes that the country merits all that is being said about it.

During his abschee he secured a good proposition or two at Good Springs and expects to return within the next few weeks to give them further attention.

BACK FROM PARIS.

C. K. McCornick Tells of Gold Road Meeting and the War.

A strike has been made in the Little Pittsburg company's property at Alta, which is considered by arrivals from camp to be the most important that has taken place within the past few months, In the lower tunnel workings a solid body of galena, the extent of which has not yet been determined, was broken into last week. It has been penetrated for a distance of ten feet, while on the hanging wall side of the drift a hole has been punched into the mass for four feet without disclosing its width.

Meeting and the War.

After four months' absence, the greater portion of which time was spent in Paris, Clarence K. McCornick reached home against yesterday morning. In company with Colonel O. P. Posey, he has been looting after the affairs of the Golf Road company and reports that a block of 30,000 shares of treasury stock was disposed of to advantage, and at the annual meeting of shareholders the old board of directors and officers were renamed. At the property, Mr. McCornick says, development is progressing with the best of results, while the mill is cleaning up an average of \$27,000 per month in gold. Colonel Posey returned to Los Angeles by the southern route, his intention being to visit the mine en route.

Therefore was spent in Paris, Clarence K. McCornick reached home against yesterday morning. In company with Colonel O. P. Posey, he has been looting after the affairs of the Golf Road company and reports that a block of 30,000 shares of treasury stock was disposed of to advantage, and at the annual meeting of shareholders the annual meeting of shareholders the remark. At the property, Mr. McCornick says, development is progressing with the best of results, while the mill is cleaning up an average of \$27,000 per month in gold. Colonel Posey returned to Los Angeles by the southern route, his intention being to visit the mine en route.

his intention being to visit the mine en routa.

Though the sympathies of France are naturally with Russia, the opinion in Paris is that Japan will be successful in the pending great struggle. The latter country's command of the scacoast and the greater mobility of its army is counted upon to accomplish its ends.

Mr. McCornick was greatly surprised at the trend of the mining share market nere in the face of the fact that the mines themselves are giving such splendid accounts of themselves. Great interest, he said, was taken in western mining, not only in the east out abroad as well, and he felt that a change for the better was close at hand.

NEW YORK-TONOPAH ANNUAL. New Crowd in Saddle and Operations to Be Resumed.

to Be Resumed.

The annual meeting of the stockholders of the New York-Tonepah Gold Mining company was held at the office of the company. 315 Progress block, yesterday, and resulted in a complete change in the management of the corporation. G. A. Land was the only officer and director re-elected for the ensuing year. There were present at the meeting sharholdrs who represented individually and by proxy a total of 723.702 shares, out of a total of 990.000 shares of stock outstanding. Dr. B. L. Brown of Philadelphia was elected president; G. A. Land of this city, vice president; Frank L. Krieder, secretary, and G. A. Hess. treasurer, while William H. Chikis of this city was elected as the remaining director.

The property of the company is located in the Tonopah mining district. Nevada, and consists of tour full claims lying close in and in the known mineral zone. Operations on the property ceased about a year ago, when results were most gratifying, as numerous stringers of had made their appearance in the shaft, which was sunk to a depth of 700 feet.

The property is fully equipped with proper machinery for continuing work and, as the new management now in control intends to begin operations almost immediately, shareholders believe there is no doubt but that the property, in which so many Salt Lake persons are interested, on the direct train of the ledges known to exist in this property.

The recent rise of over 200 per cent in the stock has been in anticipation of a change in the management. The branch office of the company will remain in Salt Lake City.
